PROFESSIONAL SUMMARY

Computer Science graduate (Summa Cum Laude, 3.9 GPA) with hands-on full-stack development experience in PHP, Python, C++, and JavaScript. Built web applications with secure authentication, database design, and server-side processing. Experience with LAMP stack administration, Git version control workflows, and security-hardened development practices including OWASP-aligned protections against SQL injection, XSS, CSRF, and brute-force attacks. Seeking entry-level Software Developer or Automation Engineer role.

TECHNICAL SKILLS

Languages: Python, C++, PHP, JavaScript, SQL
Web Development: PHP 8, MySQL/MariaDB, JavaScript, Bootstrap, HTML5/CSS3, REST API design
Database: Relational schema design, normalized data modeling, prepared statements, query optimization
Security: bcrypt password hashing, SHA512 client-side hashing, session hardening, CSRF tokens, XSS mitigation, brute-force protection, OWASP best practices
Tools & Systems: Git/GitHub, Linux, Apache, phpMyAdmin, VS Code
Methodologies: Version control workflows, code review, documentation, modular design, MVC principles

SOFTWARE PROJECTS

Secure Full-Stack Web Application | github.com/Gilltacular/PictureScanner

- Developed PHP/MySQL image repository with user registration, authentication, and color analysis engine
- Implemented hybrid authentication: client-side SHA512 hashing + server-side bcrypt verification
- Engineered brute-force protection with timed login attempt tracking and account lockout
- Prevented SQL injection via mysqli prepared statements across all database interactions
- Mitigated XSS through output escaping (htmlspecialchars) and session-based access control
- Added server-side file validation: MIME type verification, size limiting, filename sanitization
- Refactored legacy PHP 5 codebase for PHP 8.x compatibility (deprecated function replacement)
- Stack: PHP 8, MySQL, JavaScript, Bootstrap 3, Apache, EXIF image processing

Data Modeling & Query Engineering | github.com/Gilltacular/BitHeroesOneTool

- Designed 12+ interconnected data tables with relational foreign key relationships
- Built dynamic lookup functions across multiple sheets with dropdown-driven selection
- Engineered computed stat aggregation, fusion chain tracking, and parallel build comparison
- Modeled 500+ items, 120+ entities, and 88 variant configurations across 4 rarity tiers
- Stack: LibreOffice Calc, relational data modeling, formula engineering

Industrial Automation Controller | github.com/Gilltacular/warehouse-sorting-system

- Programming an Allen-Bradley PLC ladder logic for conveyor belt control and sorting operations
- Implementing photoeye-based counting, FIFO/LIFO queue management, and operational logging
- Design includes safety interlocks and error handling for fault conditions
- Stack: PLC Ladder Logic, Allen-Bradley, industrial controls

PROFESSIONAL EXPERIENCE

Alaska Department of Public Safety | Investigator, Statewide Drug Enforcement Unit | 04/2024 – 04/2026

- Managed complex multi-variable investigations requiring systematic hypothesis testing and evidence-based conclusions — methodology directly transferable to debugging and root cause analysis
- Held federal security clearance (USPIS); LEOSINT-trained in open-source intelligence gathering
- Maintained meticulous documentation standards across 50+ concurrent case files
- Sole rural investigator: self-directed workload management without direct supervision

Field Training Officer & State Trooper | Alaska DPS | 07/2020 – 04/2024

- Certified instructor: developed curriculum and trained recruits on complex procedural systems
- Translated technical regulations into actionable workflows for diverse audiences
- Court testimony: communicated technical findings to non-technical stakeholders with precision

Best Buy | Advanced Repair Agent & Communications Manager | 10/2015 – 05/2020

- Diagnosed and resolved hardware/software issues across Windows, macOS, and Linux platforms
- Configured LAN/WAN/VPN networks; managed ticketing system with SLA tracking
- Mentored junior technicians on diagnostic methodology and documentation standards

Master Builders Construction | Electrical Laborer | 04/2002 – 04/2005

- Assisted with wiring runs, fixture installation, and electrical support tasks

EDUCATION

University of Advancing Technology | B.S. Computer Science | Summa Cum Laude | 2013-2017

Relevant Coursework: Programming (Python, C++, Java), Systems Architecture, Networks, Security, Database Design, Algorithms

GPA: 3.9/4.0

CERTIFICATIONS

Texas Apprentice Electrician License #832310

OSHA-10 Construction Safety | NFPA 70E Electrical Safety

Law Enforcement Open-Source Intelligence (LEOSINT)

Field Training Officer Certification | Methods of Instruction Certification
